ALLERGY & ASTHMA CENTER

In today's economy we are all looking for value. We're spending our money carefully whether it's food shopping, buying a car or planning our vacation time. The decision to seek medical care at Allergy and Asthma Center has real value.

The impact of allergies and asthma on the household "bottom line" are many. What's the cost of not treating allergies and asthma? Increased sinus infections, more sick time or missed school days, possible emergency care, and a loss of productivity at work and school. You don't just "get over" allergies and asthma, and just taking a pill may not give you the best results. You need to find out what's causing your sneezing or wheezing or coughing or rash or respiratory infections, or many other symptoms. And then you need to treat those causes, not just the symptoms.

Allergy and asthma diagnosis and treatment are what the doctors at Allergy & Asthma Center offer to patients in their Lancaster, York, Lebanon and Ephrata area offices. The allergists at Allergy & Asthma Center include: Stephen D. Lockey, III, M.D., Clark R. Kaufman, M.D., Mark J. Titi, M.D., Amanda J. Bittner, M.D. and Laura H. Fisher, M.D. To contact the Ephrata area office call 336-0329 or the Lancaster office at 393-1365.
