

GOOD'S LAWN CARE

Good's Lawn Care of New Holland is a fully-licensed business offering residential and commercial lawn solutions including fertilization, weed and grub control for the lawn, weed control for shrub beds with Preen or hand weeding, mowing, mulching, shrub trimming, edging, overseeding and aeration.

Owning a small business has many advantages, according to owner Michael Good. He is able to take better care of his clients' needs and wants, without compromising a job well done. He has always enjoyed being outside, mowing lawns and taking care of shrub beds, and he wanted to offer his services at a more affordable rate than the average lawn care service.

One of the most effective lawn treatments Good's Lawn Care offers is the use of SynaTek fertilizer. With the application of this product, customers will notice fast green-up and quick response, an end to unsightly weeds, and healthier turf, trees and shrubs. The fertilizer is environmentally friendly and only requires three applications per year.

Good's Lawn Care wants to add you to their list of happy clients. Call them today at 717-371-2775. They look forward to hearing from you. They are located at 637 Overly's Grove Road, New Holland. You may also check their website for more information, www.goodslawncare.com.
