

ADVANCED VEIN AND LASER CENTER

If your legs feel achy, tired, heavy, restless or are swollen, Advanced Vein and Laser Center (AVLC) can help. Whether you want to get rid of spider veins, varicose veins or simply improve how your legs feel, AVLC is the place for you. Insurance covers most treatments. All procedures are completed in the office under local anesthesia. You simply walk in and walk out. Advanced Vein and Laser Center is the only IAC accredited vein center in the area!

The office is warm, friendly and personal. Patients are greeted by name and given the best possible care. Dr. David Winand is an expert in his field of vascular surgery, so you can feel confident you are receiving the best possible, personalized care to make your legs look and feel their best.

AVLC opened in April 2016. Dr. Winand attended Temple University for medical school and to complete his internship and residency. He then went on to study advanced vascular surgery at the world-renowned Mayo Clinic in Rochester, Minnesota. He has served as a member of the Lancaster surgical community for over 10 years, both at Lancaster General Health and as chief of the Division of Vascular and Endovascular Surgery at Lehigh Valley Health Network. He specializes in treating varicose veins, venous disease and superficial venous insufficiency and is an advocate for solutions that keep the effects of any procedures to a minimum. Dr. Winand opened AVLC in order to pursue his passion of vascular medicine and surgery as well as create a lifestyle that allows him to be active with his eight children.

Dr. Winand has two physician assistants working with him. Sarah Gibson PA-C and Abigail Wilson PA-C. Both Sarah and Abby are actively involved in the further development of the office through website design, advertising and general office management. Becky Spenla started in April 2018 and is an ultrasound technician. She also holds an additional certification in vascular ultrasound technology.

AVLC loves to see the dramatic improvement patients gain from their procedures. "I can't express how happy I am! Dr. Winand knew exactly how to repair my legs! I'm no longer in constant pain and numbness. I wish I wouldn't have waited as long as I did to get the work on my veins done," a recent patient commented.

Please don't hesitate to call Advanced Vein and Laser Center if you suffer from any type of leg pain. They can be reached at 717-295-8346. Office hours are Monday through Friday, 7:30 a.m. to 4:30 p.m. For more information, please view their website at www.veinsbegone.com.
