

# MARTIN TREE SERVICE, LLC

Tree removal and trimming can be dangerous and serious work if not done properly. Why attempt to do it yourself and end up damaging property or even worse, injuring yourself? Call the professionals at Martin Tree Service.

Jeff Martin is the owner of the business and has 30 years of experience. Several long-term employees have been with the company a majority of those years. Safety is one of our top priorities at Martin Tree. Part of safety is to maintain equipment correctly and often. That is why we staff a full-time mechanic to maintain all our equipment, from the crane down to the chain saws. Another part of safety is to have the crews work with each other day after day. We are able to do that by having a crane, log truck and bucket trucks operated by trained staff.

Martin Tree Service offers several options for tree work, from basic take-down to complete clean up. The basic take-down is great for the do-it-yourself type individual. We do the dangerous part by safely getting the tree on the ground for the homeowner, so they can clean up the tree themselves. Another option is for us to take down the tree, chip it and haul it away. Our final option is the premium package. In this package we not only remove the tree completely, we also grind the stump, clean up the grindings, fill the hole with topsoil and plant grass seed. All that is left for the homeowner to do is to water the grass.

Martin Tree Service is located in New Holland, Lancaster County, but we service Berks and Chester County as well. We are fully insured and qualified to take care of all your tree work needs. Wood chips and different species of firewood logs are also available for sale and delivery as needed. The office is staffed full-time Monday through Friday, from 7:00 a.m. to 5:00 p.m. and can be reached at 717-354-5939 or text only at 717-405-1323.
